Summary

Computer Science graduate and full-stack developer skilled in building scalable web applications with expertise in React.js, Node.js/Express.js, and core CS fundamentals. Seeking a Software Engineer role to leverage skills in designing and developing robust applications.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, C++, SQL, HTML, CSS
- **Frontend / Backend:** React.js, Next.js | Node.js, Express.js, REST APIs, WebSocket
- **Databases & Infra / Auth:** MongoDB, Redis, Docker (Basics) | JWT, bcrypt, RBAC
- **AI / LLM:** LangChain, RAG, AI Integration (OpenAI API)
- **Dev Tools & Deployment:** Git, GitHub, Postman, CI/CD (Vercel/Render auto-deploy on push), Vercel, Netlify, Render
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, System Design, Operating Systems

Experience

Freelance Full-Stack Developer

2025 – Present

Self-Employed

Remote

- Designed and deployed full-stack management systems for two clients (a gym and a diagnostic center), from initial requirements through production launch.
- Built responsive, role-based web apps that digitized scheduling, client records, and daily operations, replacing manual processes.
- Owned the full development lifecycle – requirements, architecture, development, testing, and deployment – while handling client communication directly.

Virtual Internship – Thiranex (Full-Stack Development)

- Built a Task Management Application enabling task creation, assignment, and status tracking for teams.
- Developed an E-Commerce Web Application with product browsing, cart, and order management.
- Created a Blog Platform with Comments, including content publishing and threaded discussions.

Software Engineering Job Simulation – Forage

- Completed a virtual job simulation performing realistic software engineering tasks for a Y Combinator-style startup application.
- Implemented frontend improvements from user feedback and shipped new backend features.
- Analyzed product and feature releases to evaluate user impact and guide development decisions.

Projects

FlowForge – Real-Time Critical Path Orchestration Engine

GitHub | Live Demo

- Engineered a scalable real-time engine with a focus on system design and microservices architecture using Node.js and Express.js.
- Integrated LangChain and the OpenAI API for AI-driven features.
- Built a real-time layer with Socket.io/WebSocket, Express.js, and Redis broadcasting graph updates within milliseconds; deployed on Render/Vercel with MongoDB Atlas.

TrackChat – Real-Time Chat & Device Tracking App (In Progress)

MERN, Socket.io, WebSocket

- Building a real-time chat app with live device-location tracking via Socket.io, WebSocket, and the HTML5 Geolocation API.
- Architecting an event-driven Node.js/Express.js backend with MongoDB for message persistence.
- Implementing JWT refresh-token rotation with a mobile-first React.js frontend.

Banking System – Full-Stack Banking Application

GitHub | Live Demo

- Engineered a full-stack banking application with a React.js frontend and RESTful Express.js/Node.js API.
- Structured the codebase into independently deployable frontend and backend modules.
- Deployed a unified pipeline hosting the backend on Render and frontend on Vercel.

Education

JIS University

Bachelor of Technology in Computer Science and Engineering

Aug 2022 – May 2026

Kolkata, India

Certifications

- Cisco Certified Network Associate – Collaboration (CCNA-C), Simplilearn – Jul 2024
- Generative AI for Developers (Advanced), Google Skills – In Progress
