SUMMARY

Computer Science graduate and full-stack developer seeking a structured learning opportunity as a Full Stack Developer Intern/Trainee, skilled in building production-style MERN applications, real-time systems, and AI-integrated features with LangChain and RAG. Proficient in React.js, Node.js/Express.js, REST API design, and core CS fundamentals (DSA, OOP, DBMS, System Design).

TECHNICAL SKILLS

Frontend/Backend:	React.js, Next.js Node.js, Express.js, REST APIs, WebSocket
Languages:	JavaScript (ES6+), TypeScript, C++, SQL, HTML, CSS
AI/LLM:	LangChain, RAG, AI Integration (OpenAI API)
Databases & Infra/Auth:	MongoDB, Redis, Docker (Basics) JWT, bcrypt, RBAC
Dev Tools & Deployment:	Git, GitHub, Vercel, Netlify, Render
Core CS:	Data Structures & Algorithms, OOP, DBMS, System Design, Operating Systems

EXPERIENCE

Freelance Full-Stack Developer 2025–Present | Self-Employed, Remote

- Designed and deployed full-stack management systems for two clients (a gym and a diagnostic center), from initial requirements through production launch.
- Built responsive, role-based web apps that digitized scheduling, client records, and daily operations, replacing manual processes.
- Owned the full development lifecycle — requirements, architecture, development, testing, and deployment — while handling client communication directly.

Virtual Internship — Thiranex (Full-Stack Development)

- Built a Task Management Application enabling task creation, assignment, and status tracking.
- Developed an E-Commerce Web Application with product browsing, cart, and order management.
- Created a Blog Platform with Comments, including content publishing and threaded discussions.

Software Engineering Job Simulation — Forage

- Completed a virtual job simulation performing realistic software engineering tasks for a Y Combinator–style startup application.
- Implemented frontend improvements from user feedback and shipped new backend features.
- Analyzed product/feature releases to evaluate user impact and guide development decisions.

PROJECTS

FlowForge — Real-Time Critical Path Orchestration Engine

[GitHub](#) | [Live Demo](#)

- Developed a real-time web application with a focus on end-to-end development, utilizing React.js, Node.js/Express.js, and MongoDB.
- Implemented AI-driven features using LangChain and OpenAI API, demonstrating ability to work with new technologies.
- Deployed the application on Render/Vercel, showcasing understanding of deployment and DevOps.

TrackChat — Real-Time Chat & Device Tracking App (In Progress)

MERN, Socket.io, WebSocket

- Built a real-time web application with a focus on collaborative development, using React.js, Node.js/Express.js, and MongoDB.
- Designed an event-driven backend with a focus on scalability and performance.
- Implemented real-time features using Socket.io and WebSocket, demonstrating ability to work with real-time systems.

Banking System — Full-Stack Banking Application

[GitHub](#) | [Live Demo](#)

- Developed a full-stack web application with a focus on end-to-end development, utilizing React.js, Node.js/Express.js, and MongoDB.
- Structured the codebase into independently deployable modules, demonstrating understanding of modular development.
- Deployed the application on Render and Vercel, showcasing ability to work with different deployment platforms.

EDUCATION

JIS University, Kolkata, India — B.Tech Computer Science and Engineering — Aug 2022 – May 2026

CERTIFICATIONS

Cisco Certified Network Associate — Collaboration (CCNA-C), Simplilearn — Jul 2024
Generative AI for Developers (Advanced), Google Skills — In Progress
