SUMMARY

Computer Science graduate and full-stack developer skilled in building production-style MERN applications, seeking a remote opportunity for structured learning and web development experience as a Full-Stack Developer Intern.

TECHNICAL SKILLS

Frontend/Backend:	React.js, Next.js Node.js, Express.js, REST APIs, WebSocket
Languages:	JavaScript (ES6+), TypeScript, C++, SQL, HTML, CSS
Dev Tools & Deployment:	Git, GitHub, Vercel, Netlify, Render
Databases & Infra/Auth:	MongoDB, Redis, Docker (Basics) JWT, bcrypt, RBAC
AI/LLM:	LangChain, RAG, AI Integration (OpenAI API)
Core CS:	Data Structures & Algorithms, OOP, DBMS, System Design, Operating Systems

EXPERIENCE

Freelance Full-Stack Developer 2025–Present | Self-Employed, Remote

- Designed and deployed full-stack management systems for two clients (a gym and a diagnostic center), from initial requirements through production launch.
- Built responsive, role-based web apps that digitized scheduling, client records, and daily operations, replacing manual processes.
- Owned the full development lifecycle — requirements, architecture, development, testing, and deployment — while handling client communication directly.

Virtual Internship — Thiranex (Full-Stack Development)

- Built a Task Management Application enabling task creation, assignment, and status tracking.
- Developed an E-Commerce Web Application with product browsing, cart, and order management.
- Created a Blog Platform with Comments, including content publishing and threaded discussions.

Software Engineering Job Simulation — Forage

- Completed a virtual job simulation performing realistic software engineering tasks for a Y Combinator–style startup application.
- Implemented frontend improvements from user feedback and shipped new backend features.
- Analyzed product/feature releases to evaluate user impact and guide development decisions.

PROJECTS

Banking System — Full-Stack Banking Application

[GitHub](#) | [Live Demo](#)

- Developed a full-stack web application, demonstrating end-to-end web development skills with React.js frontend and RESTful Express.js/Node.js API.
- Designed and implemented core banking operations, such as accounts and transactions, showcasing web development capabilities.
- Deployed a unified pipeline with backend on Render and frontend on Vercel, highlighting web development and deployment skills.

FlowForge — Real-Time Critical Path Orchestration Engine

[GitHub](#) | [Live Demo](#)

- Engineered a real-time CPM engine, integrating LangChain and OpenAI API for AI-driven features, and demonstrating web development skills with real-time systems.
- Built a real-time layer with Socket.io/WebSocket, Express.js, and Redis, broadcasting graph updates within milliseconds and showcasing web development expertise.
- Deployed on Render/Vercel with MongoDB Atlas, highlighting web development and deployment capabilities.

TrackChat — Real-Time Chat & Device Tracking App (In Progress)

MERN, Socket.io, WebSocket

- Building a real-time chat app with live device-location tracking, demonstrating web development skills with real-time systems and Socket.io/WebSocket.
- Architecting an event-driven Node.js/Express.js backend with MongoDB for message persistence, read receipts, typing indicators, and group chat, showcasing web development expertise.
- Implementing JWT refresh-token rotation with a mobile-first React.js frontend, highlighting web development and security skills.

EDUCATION

JIS University, Kolkata, India — B.Tech Computer Science and Engineering — Aug 2022 – May 2026

CERTIFICATIONS

Cisco Certified Network Associate — Collaboration (CCNA-C), Simplilearn — Jul 2024
Generative AI for Developers (Advanced), Google Skills — In Progress
