SUMMARY

Highly skilled full-stack developer with experience in building production-style MERN applications, real-time systems, and AI-integrated features. Proficient in React.js, Node.js/Express.js, REST API design, and core CS fundamentals, seeking a Senior React & React Native Developer/Architect role.

TECHNICAL SKILLS

Frontend/Backend:	React.js, Next.js Node.js, Express.js, REST APIs, WebSocket
Languages:	JavaScript (ES6+), TypeScript, C++, SQL, HTML, CSS
Databases & Infra/Auth:	MongoDB, Redis, Docker (Basics) JWT, bcrypt, RBAC
Dev Tools & Deployment:	Git, GitHub, Vercel, Netlify, Render
AI/LLM:	LangChain, RAG, AI Integration (OpenAI API)
Core CS:	Data Structures & Algorithms, OOP, DBMS, System Design, Operating Systems

EXPERIENCE

Freelance Full-Stack Developer 2025–Present | Self-Employed, Remote

- Designed and deployed full-stack management systems for two clients (a gym and a diagnostic center), from initial requirements through production launch.
- Built responsive, role-based web apps that digitized scheduling, client records, and daily operations, replacing manual processes.
- Owned the full development lifecycle — requirements, architecture, development, testing, and deployment — while handling client communication directly.

Virtual Internship — Thiranex (Full-Stack Development)

- Built a Task Management Application enabling task creation, assignment, and status tracking.
- Developed an E-Commerce Web Application with product browsing, cart, and order management.
- Created a Blog Platform with Comments, including content publishing and threaded discussions.

Software Engineering Job Simulation — Forage

- Completed a virtual job simulation performing realistic software engineering tasks for a Y Combinator–style startup application.
- Implemented frontend improvements from user feedback and shipped new backend features.
- Analyzed product/feature releases to evaluate user impact and guide development decisions.

PROJECTS

FlowForge — Real-Time Critical Path Orchestration Engine GitHub | Live Demo

- Engineered a scalable real-time engine with Node.js, Express.js, and MongoDB, utilizing REST API design and implementing topological sort, DFS cycle detection, and CPM forward/backward-pass algorithms.
- Integrated LangChain and OpenAI API for AI-driven features, demonstrating expertise in real-time systems and AI integration.
- Built a real-time layer with Socket.io/WebSocket, Express.js, and Redis, showcasing proficiency in building high-performance applications.

TrackChat — Real-Time Chat & Device Tracking App (In Progress)

MERN, Socket.io, WebSocket

- Designed and developed a real-time chat app with live device-location tracking using Socket.io, WebSocket, and HTML5 Geolocation API, highlighting skills in building real-time systems and location-based services.
- Architected an event-driven Node.js/Express.js backend with MongoDB for message persistence, read receipts, and group chat, demonstrating expertise in backend development and database management.
- Implemented JWT refresh-token rotation with a mobile-first React.js frontend, showcasing proficiency in building secure and scalable applications.

Banking System — Full-Stack Banking Application

GitHub | Live Demo

- Engineered a full-stack banking application (React.js frontend, RESTful Express.js/Node.js API) handling core banking operations, demonstrating expertise in building scalable and secure applications.
- Structured the codebase into independently deployable frontend/backend modules, showcasing skills in building modular and maintainable applications.
- Deployed a unified pipeline: backend on Render, frontend on Vercel, highlighting proficiency in building and deploying applications using cloud services.

EDUCATION

JIS University, Kolkata, India — B.Tech Computer Science and Engineering — Aug 2022 – May 2026

CERTIFICATIONS

Cisco Certified Network Associate — Collaboration (CCNA-C), Simplilearn — Jul 2024
Generative AI for Developers (Advanced), Google Skills — In Progress
